Relume Foundation Inc. is proud to salute those who support the effort of the foundation. Through your generosity, we are able to provide basic needs of human from the education to the healthcare both in New York and in Africa. Bringing the hands of the needy to the hands that are willing to provide.

Education:

The importance of education can not be overemphasized. It promotes the feeling of physical, mental and social well being by providing a better life.

SAT-prep session 1 ends to God be all the glory. The SAT-prep session

ended with a smile. With great feedback from students and parents.

Our president has the opportunity to have breakfast with parents and it was very successful and interactive. The parents expressed the need for a program like ours in the community, they believe it will bridge the gap between low functioning schools and our students dream to go to university.

Well, we believe so too....

Health:

The number of available facilities is clearly inadequate to cater for the healthcare of the largest population in Africa.

The resulting gap in healthcare delivery means that other methods of providing care must be initiated and our medical outreach programmes are one of the non-conventional avenues.

From cataract surgery to vitrectomy+silicon oil surgery to Hernia surgery are been taken care of.

Testimonies:

Read what people are saying about our service.

Here are just a few:

Mr. Eniola a community teacher in a school at Idogo community Ogun State Nigeria, has this to say;

Since Relume Foundation Inc. visit, there has been a less case of sickness among kids and adults. More interesting total number of students increased as a result of the school supplies. The student has materials to use in their various classes and schools. Even the Christian

materials are still be used in their churches and schools. God bless Relume Foundation.

Those were his exact words.

Mrs. Adeola, whose son(Onifade marvelous, Age 10) had a successful Hernia surgery, said she has Relume Foundation to thank. In her words "after the surgery, I feel so relieved and happy for my son and myself. I can walk freely with my peace of mind".

Let's hear **Mrs. Nimota Yetunde Olukowi** testimony;

My name is **Mrs. Nimota Yetunde Olukowi**. I reside in Egbeda Lagos State. I thank God for **Relume Foundation** being led by **Prof. Sherri Adeosun**. God uses the foundation to be a blessing to me when I had Retina problem in my eyes and I had to undergo a surgery urgently. The president of the foundation used the influence of the foundation in cash and in-kind for me at the eye foundation Hospital both at Ijebu Mushin and Ikeja Lagos. To God be the glory the surgery was successful and I can see better with my eyes because previously I couldn't see.

God bless **Prof. Sherri Adeosun** and her foundation.

Who else love these testimonies? because we do and this is why we what we do. we appreciate you for making it happen through your support.

Our activities.

As the project expands, so does the need for contributions to run its operation.

The **President, Relume Foundation Inc.** took a strategic Fundraising plan by organizing a Fashion show in collaboration with Bethel church New York and we are glad to tell you that it was successful. We had a couple of donations and also positive responses.

Relume Foundation is an advocate for collaboration. Joining forces to meet the need of our people. We also created a Fundraising campaign on our social media pages.

Our target is to continue treatment for those with chronic infection and disease. With your continuous support we all aimed at achieving this together as many people still need to be reached.

Like we will always say, our future is bright, strong and uplifting with the continuous support of our sponsors as well as an individual donor.
